Journal of Fluid Mechanics **Volume 340 10 June 1997**

R. E. A. Arndt, D. F. Long & M. N. Glauser The proper orthogonal decomposition of pressure fluctuations surrounding a turbulent jet *page* 1

J. Chen & K. J. Stebe Surfactant-induced retardation of the thermocapillary migration of a droplet 35

A. W. Gwinn & S. J. Jacobs Mass transport in viscous flow under a progressive water wave 61

A. L. Yarin, O. Gottlieb & I. V. Roisman Chaotic rotation of triaxial ellipsoids in simple shear flow 83

H. Li & G. Ben-Dor Analytical investigation of two-dimensional unsteady shock-on-shock interactions 101

J. Young & A. Leeming A theory of particle deposition in turbulent pipe flow 129

J. M. Nitsche & G. K. Batchelor Break-up of a falling drop containing dispersed particles 161

S. Wang & Z. Rusak The dynamics of a swirling flow in a pipe and transition to axisymmetric vortex breakdown 177

S. Lee, S. K. Lele & P. Moin Interaction of isotropic turbulence with shock waves: effect of shock strength 225

M. Short & D. S. Stewart Low-frequency two-dimensional linear instability of plane detonation 249

Y. Y. Renardy Snakes and corkscrews in core–annular down-flow of two fluids 297

V. Kumaran Velocity distribution function for a dilute granular material in shear flow 319

J. Billingham Modelling the response of a vibrating-element density meter in a two-phase mixture 343

X. Wu, S. J. Leib & M. E. Goldstein On the nonlinear evolution of a pair of oblique Tollmien–Schlichting waves in boundary layers 361

K. S. Breuer, J. Cohen & J. H. Haritonidis The late stages of transition induced by a low-amplitude wavepacket in a laminar boundary layer 395
